

Case Study

Efficient distribution at Nationwide

A mobile data system, based on wireless data terminals is helping to improve efficiency at Nationwide Building Society's distribution centre.

The distribution centre in Swindon, Wiltshire is the logistical nerve centre that joins the entire branch network to the main administration centres throughout the UK. All the key support material and member documentation is stored and distributed from there including urgent communications, pre-printed forms, point-of-sale material, secure products and the all important computer supplies.

All items are stored on bar coded pallets. Codegate supplied Symbol wireless terminals, being rugged enough to withstand the rigours of a busy warehouse.

About Codegate . . .

Codegate is a privately owned software development company, with its head office in Oxfordshire. We specialise in the provision of track & trace and mobile enterprise solutions. This includes a "full service" offering from functional specification through to design, production, implementation and ongoing maintenance.
