LabelTrace Overview

Guarantee data quality for on line results access with LabelTrace – the request, specimen, admin & clerical labelling system for GP's.

"The timesaving is dramatic."
Dr Harry Yoxall, Medical Secretary, Somerset Local Medical Committee

Carole Monaghan,
Practice Nurse,
East Quay Medical Centre

> **"We have been amazed by the time saving"**
> *Dr Tim Taylor, GP & IT Lead,*
> *Taunton Road Surgery*

LabelTrace has evolved over many years in partnership with the NHS and now sets the standard in low cost, accurate labelling for patient test request forms and samples direct from the GP clinical system.

- Compatible for use with all major primary care systems including **EMIS, INPS Vision, iSOFT and TPP SystmONE**. Also supports external clinical systems such as Anglia ICE and Dart OCM.
- Proven in over 2,500 practices throughout the UK with an installed base in excess of 16,000 label printers.
- Licence supports an unlimited number of users with no annual renewable charge.
- Installed and supported by a team of dedicated field based engineers.
- Optional Appointment Card system.

The label tells the labs who the patient is including the Patient UPI or NHS number (plus barcode), Surname, Forename, Date of Birth and also carries additional information important to the labs. The labels are generated in 'real time' on a compact direct thermal label printer.

When request forms and samples are received at the labs they are then scanned in, ensuring the requests are carried into the system with the correct patient details. The results are then available and visible to the Practice.

Cut form-filling time by 80% *and* eliminate errors

A typical LabelTrace user can save 6 hours per week; that means more patients can be seen in the same time. The system can also be used for ad hoc address labelling and similar administrative functions. What's more, LabelTrace will typically pay for itself in less than seven weeks whilst improving the accuracy and quality of sample and request data.

Benefits include :-

- Ensures all samples sent to labs are labelled with correct and adequate information, **reducing duplicate records**.

- Saves time, with a **complete set of labels printed at the press of a button**.

- **Eliminates manual transcription** and the associated possibilities for error or misinterpretation.

- Assists labs with **efficient recording of test requests**.

- Uses thermal print technology – **there's no need for messy changing of ribbons or ink cartridges.**

- Low cost of ownership, **with payback in less than 7 weeks.**

Technical Information

LabelTrace Software

Compatibility	LabelTrace is compatible with all major primary care patient administration systems, including EMIS LV, PCS, Exeter, iSoft Ganymede, Enterprise, Premier, Synergy, INPS Vision 3 and Enterprise, GPASS, Protechnic Exeter, Microtest (surcharge payable), TPP SystmOne.
Hardware Requirements	Microsoft Windows compatible PC with 5 Mb of free hard disk space; VGA graphical screen or better.
Licensing	One site license is required per practice, irrespective of the number of printers used.

LabelTrace Printer options

LabelTrace supports a choice of compact, dedicated label printers – including the Zebra 2824 and Brother QL-560. With either of these printers there is no need for consumables such as ink or toner. Please contact Codegate for advice on which printer is suitable for your practice.

About Codegate

Codegate is an expert at making information instantly available at the point of activity and has developed application-specific solutions designed to increase workforce productivity and efficiency.

Codegate is a privately owned company, with its head office in Oxfordshire. We specialise in the provision of mobile enterprise solutions into the transport, warehouse, logistics and mobile workforce markets. This includes a "full service" offering from functional specification through to design, production, implementation and maintenance of robust mobile computing and wireless technology solutions.

A Codegate solution combines a broad range of rugged handheld computers and mobile barcode printers sourced from the world's leading manufacturers, with an equally broad range of off the shelf and bespoke software for mobile solutions. Codegate is an ISO9000:2000 certified company with customers across the UK.
