

# LabelTrace Printer comparison

## Zebra ZD410 v Brother QL-570

LabelTrace is constantly adapting to meet our customer needs. In line with this policy the latest software release supports a number of different Label Printers including the Brother QL-570 and Zebra ZD410, the two printer options Codegate now supply and support as part of the LabelTrace bundled package.

The following information is intended to provide a comparison between these two printers, enabling you to choose which printer is best suited to your practice needs.

As you can see from the table the main difference is the low purchase price of the Brother QL-570. This is offset by the low label price and associated running cost of the Zebra ZD410.
